ANGRIY BATIG

P Y T H O N   D E V E L O P E R

SUMMARY

I possess a solid grasp of the software development process and the software life cycle, coupled with extensive knowledge of Python language and its various techniques. I am highly adaptable and quick to learn, with strong analytical abilities, and thrive in collaborative team environments. Proficient in object-oriented programming and web development, I have hands-on experience with frameworks like Django, FAST API and REACT. Additionally, I have a comprehensive understanding of both SQL databases such as SQLite, PostgreSQL, and noSQL databases like Redis and MongoDB.

 I believe our collaboration can be mutually beneficial and yield productive outcomes.

PROJECT EXPERIENCE

- *Project name*: Website
- Technologies: Django, SQL
- Detailed information: website for a flower shop, individual project
- *Project name*: Personal assistant
- Technologies: PYTHON, Git
- Detailed information: app that helps deal with your notes and contacts and play simple games (group project, developer)
